## Experience

Upon graduating from Pratt Institute in 1985, Mr. McGovern was employed by Mayers & Schiff Architects and Planners, N.Y., where he was involved in numerous projects most notably the New York Housing & Urban Design Times Square Revitalization Project, where he participated and contributed in the production of presentation graphics, models and conceptual design.

In 1986, Mr. McGovern joined Bertram J. Cross, Architects, P.C., NY, as an Associate Architect. He was responsible for a wide variety of commercial, residential and industrial projects from conceptual design through construction documents, specification writing and construction management. He was instrumental in the research and introduction of Computer Aided Design to this firm.

Mr. McGovern has an extensive background in computers and Computer Aided Design. He is well versed and an experienced user of Autocad, Datacad, Microsoft Word and Pagemaker software, all of which are utilized at LAN Associates, Inc.

Since joining LAN Associates, Inc., Mr. McGovern's duties as a staff architect have included preparing schematic plans, design development drawings, construction documents and specifications. He is responsible for developing CAD office standards and supervision and coordination of its operation. In addition, Mr. McGovern's responsibilities include preparing proposals, assembling bid packages for State and municipal review, recommending award of contracts, conducting pre-construction meetings, and coordinating projects under construction by performing field inspections and construction management. Additional responsibilities include reviewing shop drawing submittals, supervising design, mechanical, electrical, plumbing, and structural coordination of construction documents.

Mr. McGovern works on projects which include new construction and renovation for Boards of Education, private residential and commercial clients.
